

SOMETIMES THE BEST THINGS COME IN SMALL PACKAGES!
REACH YOUR CUSTOMERS WHERE LARGE FORMAT CANNOT...

They say big is beautiful, but when space is limited & you still want your message to be seen a large format display would simply not fit. Rather than only being able to promote your messages at entrances or in open spaces, our small format solutions allows you to carry this messaging on across all areas of your business – even when space is at a premium.

Our SL Solution is already being selected by some of the world's leading businesses who recognize that, like for like, it represents phenomenal value for money and ROI... But one of its best features is the wide range of sizes available.

Our small format sizes are 19", 22" & 32" which perfectly complement our larger displays. The best bit... They all look **identical** to their larger counterparts & all feature the **exact same functionality** and CMS platform to control them.

This allows you to create a consistent look & feel across your business whilst still retaining the same functionality and control of the display regardless if it is a 19" or 55"

IDEAL FOR YOUR BUSINESS...

Utilizing small format in the right areas ensures dynamic and impactful messaging can reach your customers and actually influence their buying decisions or their impression of your brand or business:
