

TOPAZ DELIVERS A ONE PART SOLUTION PROVIDING TRUE NETWORKED DIGITAL SIGNAGE RIGHT OUT OF THE BOX

Deploying enterprise grade digital signage can now be as simple as connecting one plug!

One of the biggest barriers to entries faced by most businesses when considering to deploy digital signage is the complexities faced due to the myriad of options and components that go into making up a digital network. Combining multiple pieces of hardware with software from a different vendor and then trying to make it all work together!

TOPAZ Digital is committed to delivering commercial grade solutions that are dramatically simplified, making the specification, deployment and use of the digital signage much easier and putting it within the reach of all businesses. TOPAZ™ displays not only look great but deliver simple to install and easy to use networked digital signage right out of the box.

TOPAZ™ SL SOLUTION

OTHER PROVIDER'S SOLUTION

Everything contained within one display – Screen, Media Player, Wi-Fi & Software License

NO recurring software costs, what you pay on day one covers everything

Just connect one plug & add power!

We believe when you commit to a digital signage installation you should get everything you need in one box, not have to shop around to multiple sources & then pay someone else to connect them all together to make them work!

With TOPAZ the price you pay on day one is the total price for the life of the product – we even include the wall mount!
